My site is in English, but I have a woocommerce site in Czech. Currently the way I get the value of products is: `$product_ids = array(325,324,222,321,310,321); // product ids $categories = 'featured'; // product category $offset = 0; $limit = 10; $args = array('post_type' => 'product', 'post__not_in' => $product_ids, 'posts_per_page' => $limit, 'category__in' => $categories, 'paged' => $offset, 'orderby' => 'date', 'order' => 'ASC', 'post_status' => 'publish'); $products = get_posts($args); echo ""; print_r($products); echo "";` This code gives me the products in order, but I need to get the values. For example, I need to get the value of Product ID 325 and return the value 7. A: Try this method to get the value, `$products = get_posts($args); foreach($products as $product) { $this_product_id = $product->ID; $values = $product->get_id(); }` Butachlor-induced immunotoxicity in mice.
